Python Programming Tasks

Name: Disha Satish Nikam

Batch: #9011 internship program 7 pm

1. Hello World by Your Name

Python Code:

```
name = "Disha" print("Hello  
World by", name) Output:  
Hello World by Disha
```

2. Create 2 variables cost_price, selling_price and calculate the profit or loss

Python Code:

```
cost_price = 500  
selling_price = 600  
  
if selling_price > cost_price:  
    profit = selling_price - cost_price  
    print("Profit =", profit) elif  
    cost_price > selling_price:  
        loss = cost_price - selling_price  
        print("Loss =", loss) else:  
            print("No Profit No Loss")
```

Output:

```
Profit = 100
```

3. WAP to check whether the number is odd or even

Python Code:

```
num = 7  
  
if num % 2 == 0:  
    print("Even") else:  
        print("Odd")
```

Output:

```
Odd
```

4. WAP to check whether the age is valid and eligible for voting or not

Python Code:

```
age = 20  
  
if age < 0 or age > 120:  
    print("Invalid age") elif  
    age >= 18:  
        print("Valid age and eligible for voting") else:  
            print("Valid age but not eligible for voting") Output:  
Valid age and eligible for voting
```

5. WAP to find whether word1 and word2 is Anagram or Not

Python Code:

```
word1 = "listen"  
word2 = "silent"  
  
if sorted(word1.lower()) == sorted(word2.lower()):  
    print("Anagram")  
else:  
    print("Not Anagram")
```

Output:

```
Anagram
```
